

Optimization of Processing and Modeling Issues for Thin Film Solar Cell Devices: Final Report (Paperback)

Filesize: 8.62 MB

Reviews

These types of book is the greatest ebook readily available. I was able to comprehended every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.

(Dr. Porter Mitchell)

OPTIMIZATION OF PROCESSING AND MODELING ISSUES FOR THIN FILM SOLAR CELL DEVICES: FINAL REPORT (PAPERBACK)

To download **Optimization of Processing and Modeling Issues for Thin Film Solar Cell Devices: Final Report (Paperback)** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with OPTIMIZATION OF PROCESSING AND MODELING ISSUES FOR THIN FILM SOLAR CELL DEVICES: FINAL REPORT (PAPERBACK) ebook.

Bibliogov, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This report describes results achieved during a three-year subcontract to develop and understand thin-film solar cell technology associated to CuInSe₂ and related alloys, a-Si and its alloys, and CdTe. Modules based on all these thin films are promising candidates to meet DOE long-range efficiency, reliability, and manufacturing cost goals. The critical issues being addressed under this program are intended to provide the science and engineering basis for the development of viable commercial processes and to improve module performance. The generic research issues addressed are: 1) quantitative analysis of processing steps to provide information for efficient commercial-scale equipment design and operation; 2) device characterization relating the device performance to materials properties and process conditions; 3) development of alloy materials with different bandgaps to allow improved device structures for stability and compatibility with module design; 4) development of improved window/heterojunction layers and contacts to improve device performance and reliability; and 5) evaluation of cell stability with respect to illumination, temperature, and ambient and with respect to device structure and module encapsulation.
