Book Condition: New. Publisher/Verlag: Springer, Berlin | Volume 3 Biosynthesis of Macromolecules and Molecular Metabolism | Pseudomonas comprises three volumes covering the biology of pseudomonads in a wide context, including the niches they inhabit, the taxonomic relations among members of this group, the molecular biology of gene expression in different niches and under different environmental conditions, the analysis of virulence traits in plants, animals and human pathogens as well as the determinants that make some strains useful for biotechnological applications and promotion of plant growth. There has been growing interest in pseudomonads and a particular urge to understand the biology underlying the complex metabolism of these ubiquitous microbes. These bacteria are capable of colonizing a wide range of niches, including the soil, the plant rhizosphere and phyllosphere, and animal tissues; more recently they have attracted attention because of their capacity to form biofilms, a characteristic with potentially important medical and environmental implications. The three volumes cover the following topics: - Taxonomy, - Genomics, - Life styles, - Cell Architecture, - Virulence, - Regulation, - Macromolecules, - Alternative Respiratory Substrates, - Catabolism and Biotransformations. Pseudomonas will be of use to all researchers working on these bacteria, particularly those studying microbiology, plant crops, pathogenesis, and chemical engineering. Advanced students in biology, medicine and agronomy will also find these three volumes a valuable reference during their studies. | Volume I:- Taxonomy. 1. Taxonomy of Pseudomonads; N. Palleroni, E. Moore. Genomics. 2. The genome of Pseudomonas aeruginosa; B.R. Kulasekara, S. Lory. 3. Genomic Features of Pseudomonas putida Strain KT2440; V.A.P. Martins dos Santos, K.N. Timmis, B. Tümmeler, C. Weinel. 4. The Genome of Pseudomonas syringae Tomato DC3000 and Functional Genomic Studies to better Understand Plant Pathogenesis; Y. Jamir, X. Tang, J.R. Alfano. 5. Comparative Genomics of Four Pseudomonas Species; L. Juhl Jensen, M. Skovgaard,...
