

32.5: The Divine Mathematics of the Calendar (Paperback)

Filesize: 1.48 MB

Reviews

An extremely wonderful publication with lucid and perfect reasons. It typically will not expense too much. You are going to like the way the blogger compose this publication.

(Prof. Maya Hand)

To read **32.5: The Divine Mathematics of the Calendar (Paperback)** PDF, remember to click the button listed below and save the file or have accessibility to additional information that are in conjunction with 32.5: THE DIVINE MATHEMATICS OF THE CALENDAR (PAPERBACK) ebook.

Createspace, United States, 2015. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book ***** Print on Demand *****.- Black White Edition. - Discovery of 32.5! - Straightforward Concise Edition! - Topic is scarcely addressed by authors, hence, the book is unique! - Enjoyable! -----
 ----- Topic: Divine Calendar Title: Thirty Two Point Five 32.5 Subtitle: The Divine Mathematics of the Calendar --
 ----- In this thesis I investigate the relation between the solar and lunar calendars and prove its divine function. That was possible for me to embark upon while studying an article, by Dr. Elnaby; he published his discovery of a Quran s verse, that contains the parameters that provide Physicists with the exact numbers that aid in calculating the speed of light value, along with the complete calculations. I am the first person who validates Dr. Elnaby s discovery by examining the boundaries of today s best institutions of Physics who standardize the results of their measurements throughout the world; I used the speed of light values published by The British National Physical Laboratory and The US National Bureau of Standards to investigate the range of accuracy, between these values and the fixated value, at which the speed of light stands today. I found out that the margin of error in the measurements of these two scientific institutions is not different from the value that Dr. Elnaby has calculated. I published also my own discovery of the relation between the speed of light and the lunar calendar. I referred to the book of Christopher Knight and Alan Butler, Who Built The Moon?, and provided a very interesting link to their thesis. I present my mathematics in this book as detailed as possible to help the reader check by her-/himself the level of its impeccability. All...
