

Food Preparation Methods used in the Neolithic Period

By Holger Skorupa

GRIN Verlag GmbH Dez 2013, 2013. Taschenbuch. Book Condition: Neu. 211x146x5 mm. This item is printed on demand - Print on Demand Neuware - Essay from the year 2008 in the subject History - World History - Early and Ancient History, The University of Liverpool, course: Diet, Evolution and Culture, language: English, abstract: About 10.000 years ago the Neolithic revolution was the starting point of both the domestication of animals and the cultivation of plants in the Near East. Due to climatic changes at the beginning of the Holocene and probably distinctively connected to a variation of food preparation throughout several parts of the earth including Europe, North America and Asia, the introduction of agriculture led to a rapidly increased population, a forthcoming of health and, therefore, a longer life expectancy. For plenty of years, however, this intention was suggested by medical, anthropological as well as evolutionary and social-historical examines. Since the last few decades, the currently regarded conclusions of researchers have been significantly overthrown, as the utilization of computer-assisted technology has been improved and observations dealing with stable isotopic issues rather than archaeological artefacts or morphological alterations have been enlarged. Consequently, new explorations allow further research and more detailed...
