In May 2005, the National Transportation Safety Board (NTSB) began its investigation of a school bus accident that occurred in Liberty, Missouri. During the course of the investigation, information was uncovered that suggested pedal misapplication as a factor in the accident—that is, depressing the accelerator instead of, or in addition to, the brake pedal. The NTSB subsequently investigated four additional accidents in Falls Township and Newtown, Pennsylvania; Asbury Park, New Jersey; and Nanuet, New York involving heavy vehicles in which pedal misapplication was determined to be a factor. Despite varying circumstances, these five accidents share common elements. In all five, the drivers either reported a loss of braking or were observed by vehicle occupants to be unsuccessfully attempting to stop the vehicles, though no evidence of braking system failure was found. This item ships from La Vergne, TN. Paperback.
